Gas Turbine
FLEX-HOSE
Pressure Testing

FLEX-HOSE Pressure Testing

Specializing in GE and Siemens Gas Turbines

flex-hose pressure testing with visual inspection

On site testing at customers location, reducing downtime, limiting exposure to freight damage and delivery delays and keeping all the hoses to be testing on the customer's site.

- Test certificates will be issued for every hose that is tested and passes pressure testing
- Any hose with physical damage will be marked with color tape to allow the customer to inspect and evaluate for replacement
- Hoses can also be shipped to our facility in Bayville, NJ to be tested at our location at no additional cost
